Projects

💻 Laundry Book App

- Developed an Android application for users to book laundry services.
- Implemented features such as user authentication, service selection, and booking management.
- Utilized Firebase for backend integration and real-time updates.

💻 Memes Watching App

- Created an Android app that allows users to browse and watch memes from various sources.
- Integrated APIs to fetch meme data and implemented features like search, bookmarking, and sharing.
- Designed an intuitive user interface with smooth scrolling and image loading.

💻 Wallpaper App

- Developed an Android application for users to browse and set wallpapers on their devices.
- Implemented features like category-based wallpaper selection, favorites, and wallpaper downloading.
- Utilized caching mechanisms to improve performance and minimize data usage.

Skills

- **</> Programming Languages:** Java, Javascript, C
- **Mobile Development:** Android Studio, react-native

- 🗄 **Database Management:** Firebase
- ⑂ **Version Control:** Git, GitHub
- 🧠 **Problem Solving:** Data Structures, Algorithms

Additional Information

- 🔤 **Languages:** English , Hindi
- 💡 **Interests:** Science-fiction movie, Technology, Ai tools
- 👐 **Volunteer Work:** Organized coding workshops for local schools and participated in community service events.
